## **ECS LSB-S30 COMPACT SUBWOOFER**

ſ SUBWOOFE LSB-S30 COMPACT ECS

The E-coustic Systems LSB-S30 is our latest addition in compact subwoofers. It incorporates a long throw 12" transducer that provides bass extension to 30 Hz. Its compact size, combined with its ability to faithfully reproduce very low frequency content makes it an ideal addition to small houses of worship with pipe organs. In larger venues, it can be distributed in plenum spaces under seating, as well as above ceilings where space may be limited.

COUSTIC

## SPECIFICATIONS

Operating bandwidth 37 Hz - 67 Hz -3dB

Sensitivity 95dB SPL @ 1 meter referenced 2.83v ½ space measured as 28.3v @10 meters

Peak Output 127 dB SPL Maximum Output 121dB SPL

Impedance 8 ohms nominal

Power Handling 400 w Continuous 800 W Program Transducers 12" Long Extension

Dimensions 24"H x 15"W x 22.5" D Weight 83 ILbs.

Construction 13 Ply Baltic Birch Polyurea Coated
