The E-coustic Systems LCF-288 is a purpose-built three-way loudspeaker designed to be mounted on the top of wooden beams in houses of worship. It utilizes the LCF-399 coaxial speaker combined with an 8” full range device that utilizes a separate crossover network to deliver greater overall power. The enclosure is designed to create minimal visual impact when installed.

**Specifications**

- **System Type:** Sealed chamber
- **On Axis Freq. Res:**
  - 70 Hz-20 kHz ± 3 dB
- **Sensitivity:** 95 dB/1W/1M
- **Impedance:** 8 ohms
- **Power Handling:** 100 Watts (AES Std.)
- **Input Connectors:** Cinch 142 screw terminal barrier strip
- **Enclosure:** 5/8” MDF, lock miter joints
- **Finish:** Black paint
- **Dimensions:** 34”H x 11”W x 6”D
- **Weight:** 34 Lbs.
